## Troubleshooting:

Item/Location	Description/Symptoms	Next Steps/Actions
<b>SET UP AND POWER ON/OFF:</b>		
Setting up and powering on	How to	<ol style="list-style-type: none"> <li>1. Go to <a href="#">SimSpray Support</a>.</li> <li>2. Select your model type.</li> <li>3. Go to "Quick Start Guide."</li> </ol>
Setting up and powering off		

<b>EQUIPMENT SETTINGS:</b>		
Equipment Settings screen - Incorrect Settings	<p>When clicking "Proceed" on the Equipment Settings screen, you get the "Incorrect Settings" message.</p> 	<ol style="list-style-type: none"> <li>1. Use the values found in the Paint or Project Settings. See the <a href="#">Default Paint Types</a> (software v3.3.x or later) or <a href="#">Default Project List</a> (software v3.2.x or earlier). <ol style="list-style-type: none"> <li>a. This applies to VRSim default content. For custom projects and lessons, ask your teacher to identify the settings in the Admin portal of the SimSpray software.</li> </ol> </li> <li>2. OR: log into Admin Mode, select Score Settings, Proceed, change Machine Settings to "Automatic", Apply, and Log Out. This automatically sets the proper settings on the Equipment Settings screen. (Software v3.2.1 and later)</li> </ol>

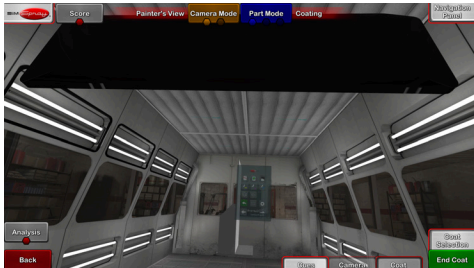

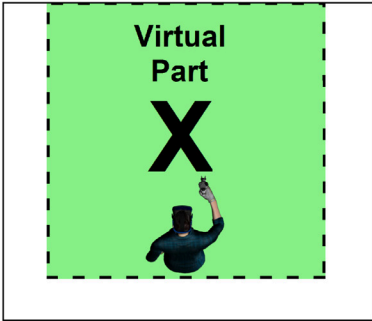

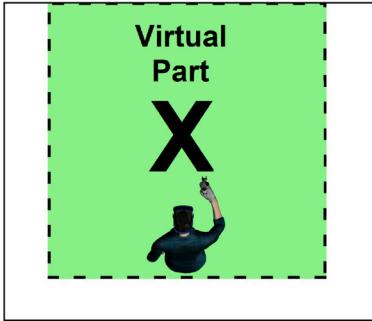

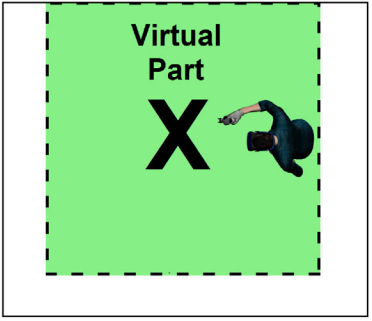

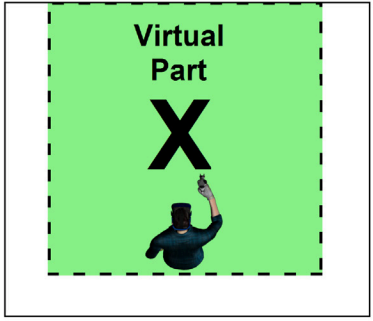

<b>ADMIN MODE:</b>		
Cannot access Admin mode		<ol style="list-style-type: none"> <li>1. After turning on the system and selecting a product, click on "Admin."</li> <li>2. Use the code provided with your system. It is typically printed on a small card. <ol style="list-style-type: none"> <li>a. If someone in your organization has changed the code, request this from them.</li> <li>b. If you do not know the new code or cannot find the default passcode, contact tech support.</li> </ol> </li> </ol>

Item/Location	Description/Symptoms	Next Steps/Actions
---------------	----------------------	--------------------

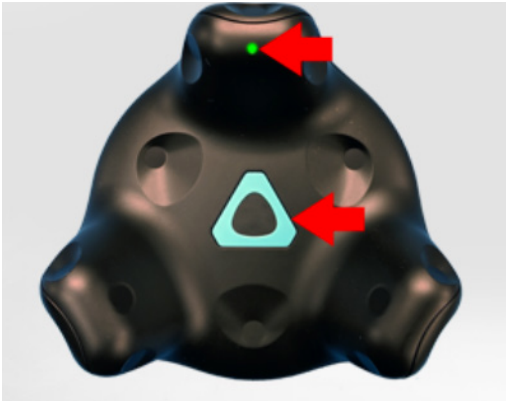

GUN PAINTING:		
Painting - Gun stuck painting or in air stage	After releasing the physical gun's trigger, the virtual gun continues to paint in the paint or air stage. The physical gun vibrates when not being physically triggered	<ol style="list-style-type: none"> <li>1. <a href="#">Check your software version.</a></li> <li>2. If you are running software version 3.2 or later: <ol style="list-style-type: none"> <li>a. <a href="#">Apply a content update fix for the gun.</a></li> </ol> </li> <li>3. Otherwise, contact tech support.</li> </ol>

WINDOWS UPDATES:		
Windows Updates	<p>Windows notifies you:</p> <ul style="list-style-type: none"> <li>• There are Windows updates available.</li> <li>• Do you want to update from Windows 10 to Windows 11</li> </ul>	<ol style="list-style-type: none"> <li>1. We highly recommend <a href="#">Suppressing Windows Updates</a> <ol style="list-style-type: none"> <li>a. Otherwise, your operating system may become incompatible with your system.</li> <li>b. Updating from Windows 10 to Windows 11 <u>is not supported</u>. <ol style="list-style-type: none"> <li>i. Keep whatever version of Windows your system originally shipped with.</li> </ol> </li> </ol> </li> </ol> <p><i>This applies to SimSpray units produced near the end of November 2021 to April 2023. Units produced before or after this have Windows Updates suppressed.</i></p>

MOTION TRACKING:		
Positioning SimSpray for best motion tracking	<p>When wearing the HMD:</p> <ul style="list-style-type: none"> <li>• The part is behind the SimSpray unit</li> <li>• The environment or part seem: <ul style="list-style-type: none"> <li>○ far away</li> <li>○ too high or low</li> <li>○ rotated incorrectly</li> </ul> </li> <li>• The view in the HMD does not change when you move your head.</li> <li>• It looks like your view or the gun is/are moving or flying away when you are not moving either.</li> </ul>	<p>Steps:</p> <ol style="list-style-type: none"> <li>1. Use a compatible environment: <ol style="list-style-type: none"> <li>a. Rotate or aim SimSpray away from windows, TVs, infrared sources, and reflective materials. Minimize reflections or infrared interference. SimSpray uses a camera based tracking system. Cover sources of IR (Infrared) interference, turn off infrared emitting devices, and turn off nearby Bluetooth devices for best results.</li> <li>b. Keep SimSpray away from dust and dirt. It is intended on being used in an office setting, not a paint shop.</li> </ol> </li> <li>2. Use the expected location: <ol style="list-style-type: none"> <li>a. For software version 3.4 or after:</li> </ol> </li> </ol>
Part or environment are too far away, high, low, or rotated incorrectly		
Gun or HMD are not motion tracking properly (wrong location or flying away)		

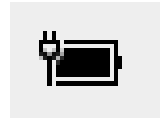

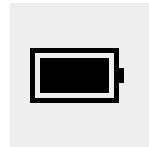

Item/Location	Description/Symptoms	Next Steps/Actions
	<p>Correct view (when a user wearing VIVE is facing the SimSpray unit). Notice the virtual part is nearby:</p>  <p>Incorrect view (when a user wearing VIVE is facing the SimSpray unit). Notice you are seeing the back of the scoreboard:</p> 	<div><div><p><b>SimSpray 3</b> Top view</p></div><div></div></div> <div><div><p><b>SimSpray Go</b> Top view</p></div><div></div></div> <p>b. For software version 3.3.3 or before:</p> <div><div><p><b>SimSpray 3</b> Top view</p></div><div></div></div> <div><div><p><b>SimSpray Go</b> Top view</p></div><div></div></div> <p>3. Check warnings:</p> <ol style="list-style-type: none"><li>Take off the HMD.</li><li>Look at the monitor.</li><li>If any of the following warnings appear, follow the troubleshooting for the corresponding item(s):<ol style="list-style-type: none"><li><a href="#">“Gun Not Visible / Check Gun Light”</a></li></ol></li></ol>

Item/Location	Description/Symptoms	Next Steps/Actions
		<ul style="list-style-type: none"> <li>ii. <a href="#">“HMD Not Visible”</a></li> <li>iii. <a href="#">“Left Base Station Not Visible”</a></li> <li>iv. <a href="#">“Right Base Station Not Visible”</a></li> </ul> <ol style="list-style-type: none"> <li>4. Reset Space (<i>software version 3.2.x or later</i>):               <ol style="list-style-type: none"> <li>a. Click the “SimSpray” menu, and select “Reset Space.”</li> <li>b. Follow the onscreen instructions.</li> <li>c. Repeat 1-2 more times if issues are not resolved.</li> </ol> </li> <li>5. Recalibrate (<i>software versions 3.0.x or 3.1.x</i>):               <ol style="list-style-type: none"> <li>a. Click the “SimSpray” menu, select “Recalibrate,” and confirm.</li> <li>b. Go back into the motion tracked zone, and put on the HMD.</li> <li>c. Wait up to 1 minute and see if the issue is resolved.</li> <li>d. Repeat 1-2 more times if issues are not resolved.</li> </ol> </li> <li>6. Follow <a href="#">“Jittery motion tracking.”</a></li> <li>7. Follow <a href="#">“No gun”</a>.</li> <li>8. Follow <a href="#">“HMD Not Visible.”</a></li> <li>9. If using a Powder Gun, remove the “SimSpray Powder” stickers. (These can sometimes cause infrared reflectivity that can interfere with motion tracking.)</li> <li>10. Make sure you have not changed the Windows region settings. See <a href="#">Windows Region Settings</a>.</li> <li>11. If the base station connection feels loose around the screws that hold either in:               <ol style="list-style-type: none"> <li>a. Hold the base station as you use an allen wrench to slightly unscrew the screw.</li> <li>b. If you are able to purchase Loctite:                   <ol style="list-style-type: none"> <li>i. Hold the base station as you use an allen wrench to fully unscrew the screw.</li> <li>ii. Add a drop of Loctite to the screw.</li> <li>iii. Screw the screw back in, but do not tighten.</li> </ol> </li> <li>c. Reorient the base station so it is upright (not rotated).</li> <li>d. Retighten the screw via an allen wrench.</li> </ol> </li> </ol>
No gun	You do not see the virtual gun when you move the physical spray, powder, or blast gun and are wearing the HMD.	<ol style="list-style-type: none"> <li>1. Power on the VIVE Tracker:               <ol style="list-style-type: none"> <li>a. On the gun’s VIVE Tracker, if the status light is off (not lit), ensure the USB is inserted firmly into the back of the Tracker.</li> <li>b. If the status light is white, press and hold the blue button for 1 second, and release.</li> </ol> </li> </ol>
Gun not visible		
Gun not motion tracked		

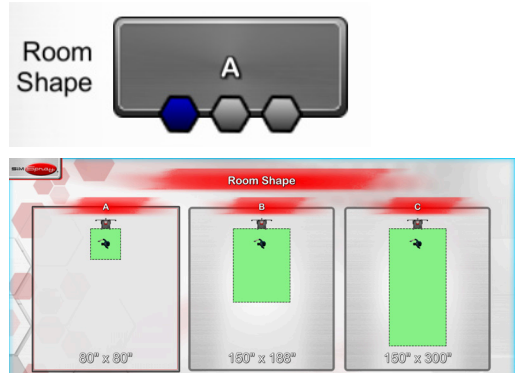

Item/Location	Description/Symptoms	Next Steps/Actions
	<p>Warning appears on the monitor.</p> 	 <ol style="list-style-type: none"> <li>i. The light should turn green, orange, or red.</li> <li>ii. If the light turns blue, wait 30 seconds, and it should then turn one of the other colors.</li> <li>c. (If the status light is orange, normally you do not need to press the button to turn the tracker on. It will already be charging and connected.)</li> </ol> <ol style="list-style-type: none"> <li>2. Reposition the gun so the motion tracking system sees it: <ol style="list-style-type: none"> <li>a. Follow steps in <a href="#">“HMD Not Visible.”</a></li> </ol> </li> <li>3. If the VIVE Tracker light does not turn on: <ol style="list-style-type: none"> <li>a. Check the cable connection to the VIVE Tracker.</li> <li>b. For Blasting, check the cable connection to the SimSpray unit.</li> <li>c. Note: if these do not resolve the issue, you may need to check the connections on the inside of the SimSpray unit. See <a href="#">“Accessing the inside of the SimSpray unit.”</a> Or the cable and/or VIVE Tracker may need to be replaced. Contact VRSim tech support.</li> </ol> </li> <li>4. For Blasting: <ol style="list-style-type: none"> <li>a. Run <a href="#">“Blasting Details.”</a></li> </ol> </li> <li>5. Make sure you have not changed the Windows region settings. See <a href="#">Windows Region Settings</a>.</li> </ol>
Jittery motion tracking Intermittent motion tracking Pauses or stutters in motion tracking	The HMD or Gun jitter excessively or intermittently lose tracking. Or the motion tracking feels stuttery, not smooth, or like it keeps pausing.	<p><i>Note: SimSpray uses a camera based tracking system. Reflections, infrared devices, or other VIVE motion tracking systems in the area may degrade the motion tracking.</i></p> <ol style="list-style-type: none"> <li>1. Move yourself, your HMD (Head Mount), and your Gun into the motion tracked zone. Follow these, in this order: <ol style="list-style-type: none"> <li>a. <a href="#">“Positioning SimSpray for best motion tracking.”</a></li> </ol> </li> </ol>

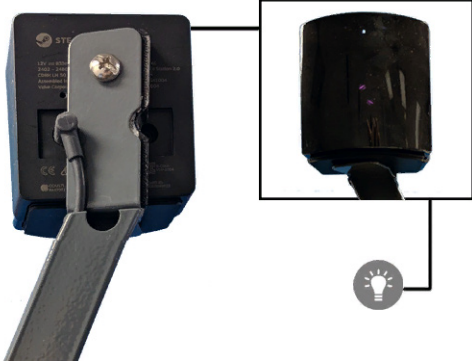

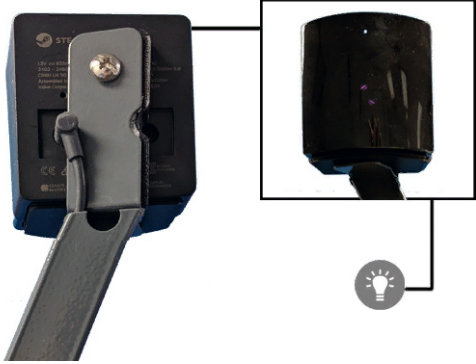

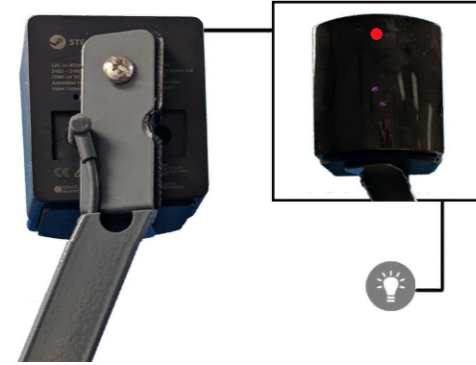

Item/Location	Description/Symptoms	Next Steps/Actions
		<ul style="list-style-type: none"> <li> <ul style="list-style-type: none"> <li>b. <a href="#">“HMD Not Visible.”</a></li> <li>c. <a href="#">“Gun Not Visible.”</a></li> </ul> </li> <li>2. Rotate the SimSpray unit.           <ul style="list-style-type: none"> <li>a. Rotating the unit (e.g., in 90 degree increments) can decrease environmental issues and improve motion tracking.</li> </ul> </li> <li>3. Reposition the SimSpray unit.           <ul style="list-style-type: none"> <li>a. Move the SimSpray unit somewhere else in the room or to a different room.</li> </ul> </li> <li>4. Minimize reflections or infrared interference.           <ul style="list-style-type: none"> <li>a. Cover sources of IR (Infrared) interference.</li> <li>b. Turn off infrared emitting devices.</li> <li>c. Reorient, reposition, or move the SimSpray system away from reflective materials or infrared sources.</li> </ul> </li> <li>5. Remove obstructions:           <ul style="list-style-type: none"> <li>a. Make sure there are no obstructions between:               <ul style="list-style-type: none"> <li>i. The base stations and the gun.</li> <li>ii. The base stations and the HMD.</li> </ul> </li> <li>b. If using a SimSpray Go unit, make sure the laptop is as forward as possible. Make sure the fan air vents under the laptop are not blocked.</li> </ul> </li> <li>6. Do not cover the HMD with your hand.           <ul style="list-style-type: none"> <li>a. Normally if someone has a hand on the HMD during use, it means the HMD does not fit well. Adjust the top strap and back knob of the HMD so the HMD is a comfortable fit. Make sure to keep your hand off the HMD while painting, blasting, or powder coating.</li> </ul> </li> <li>7. Do not side gun away from the base stations:           <ul style="list-style-type: none"> <li>a. If you are holding the gun sideways so the gun body is obscuring the gun’s tracker from line of sight with the base stations, then instead:               <ul style="list-style-type: none"> <li>i. Keep the gun vertical and turn the nozzle orientation 90 degrees.</li> <li>ii. Or turn the gun to the other side so it sees the base stations.</li> <li>iii. Or move to the opposite side of the part, and rotate the part 180 degrees around the vertical axis.</li> </ul> </li> </ul> </li> <li>8. If there are Bluetooth devices in the room, turn them off so that they don't interfere with hardware pairing. Bluetooth may cause motion tracking drifting.</li> </ul>

Item/Location	Description/Symptoms	Next Steps/Actions
		<p>9. If running a software version before v3.4:</p> <ol style="list-style-type: none"> <li>Toggle all Visual Cues on and then off every hour of use or when the symptoms occur.</li> <li>Alternatively, contact support to see if you are eligible for or can purchase software v3.4 or later.</li> </ol> <p>10. If using aSimSpray Go unit:</p> <ol style="list-style-type: none"> <li>Make sure the laptop is connected to power (not running on battery): <ol style="list-style-type: none"> <li>Tap the Windows key.</li> <li>Look at the system tray.</li> <li>If the laptop is powered, it will show the following icon: <div data-bbox="1417 561 1575 677" data-label="Image">  </div> <ol style="list-style-type: none"> <li></li> </ol> </li> <li>If instead you see the following icon, then check the power cable is connected at back of the laptop, theSimSpray Go power cable is connected to a power outlet, lift up the laptop and foam up, check the laptop power brick is attached to the power strip, and check the laptop power brick is attached to its power cable. <div data-bbox="1417 902 1564 1047" data-label="Image">  </div> <ol style="list-style-type: none"> <li></li> </ol> </li> </ol> </li> <li>Using the mousepad or mouse, click on the SimSpray software again to focus off of the Windows taskbar.</li> </ol> <p>11. Adjust the forward-to-back position:             <ol style="list-style-type: none"> <li>a. Change the Room Shape:                 <ol style="list-style-type: none"> <li>i. See <a href="#">"Motion tracked spatial volume adjustment."</a></li> </ol> </li> </ol> </li> <li>3. Adjust the forward-to-back or left-to-right position:             <ol style="list-style-type: none"> <li>a. Reset Space:                 <ol style="list-style-type: none"> <li>i. See <a href="#">"Positioning SimSpray for best motion tracking."</a></li> </ol> </li> </ol> </li> <li>4. Make sure motion tracking is working correctly:             <ol style="list-style-type: none"> <li>a. Check warnings, Reset Space, or Recalibrate:                 <ol style="list-style-type: none"> <li>i. Follow the steps for <a href="#">"Positioning SimSpray for best motion tracking."</a></li> </ol> </li> </ol> </li> </ol>
Motion tracked spatial volume adjustment	Change the motion tracked zone size (e.g., for larger or smaller rooms).	<p><i>Note: the following applies to v3.3.3 or earlier:</i></p> <ol style="list-style-type: none"> <li>1. Click on the "SimSpray" menu.</li> <li>2. Select "Options."</li> </ol>

Item/Location	Description/Symptoms	Next Steps/Actions
		<p>3. Press “Room Shape” to toggle the room shape.</p>  <p><i>Note: in SimSpraySimSpray Go, the motion tracked volume has the longer side left-to-right vs. as shown above.</i></p> <p><i>Note: v3.3.2 defaults to room shape B each time the user gets into the virtual environment. v3.4 has a single, default room shape.</i></p>
“HMD Not Visible”	<p>One or more warnings appear on the monitor.</p> 	<ol style="list-style-type: none"> <li>1. Move yourself and your HMD (Head Mount) into the motion tracked zone. Note that you may need to step back, away from the SimSpray unit monitor.</li> <li>2. Remove obstructions: <ol style="list-style-type: none"> <li>a. Make sure there are no obstructions between: <ol style="list-style-type: none"> <li>i. The base stations and the gun.</li> <li>ii. The base stations and the HMD.</li> </ol> </li> </ol> </li> <li>3. Do not cover the HMD with your hand. <ol style="list-style-type: none"> <li>a. Normally if someone has a hand on the HMD during use, it means the HMD does not fit well. Adjust the top strap and back knob of the HMD so the HMD is a comfortable fit. Make sure to keep your hand off the HMD while painting, blasting, or powder coating.</li> </ol> </li> <li>4. Make sure the small light at the front of each of the two base stations (black boxes on the tops of the metal arms for SimSpray) (black boxes on the inside top of SimSpraySimSpray Go) is lit with a green light. If not: <ol style="list-style-type: none"> <li>a. Access the inside of the SimSpray unit. See <a href="#">“Accessing the inside of the SimSpray unit.”</a></li> <li>b. Connect the HLO and HRO AC/DC power bricks if either is disconnected from the power strip.</li> <li>c. Wait 30 seconds.</li> <li>d. If either base station’s light is still unlit, continue.</li> </ol> </li> </ol>
“Left Base Station Not Visible”		
“Right Base Station Not Visible”		

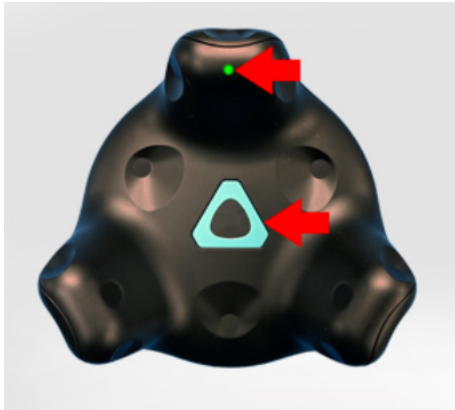

Item/Location	Description/Symptoms	Next Steps/Actions
		<p>e. Connect the HLO and HRO power cable connections to the base stations if either cable is disconnected. Note: for SimSpraySimSpray Go, you may need to unscrew a fastener on the case lid to access the base stations.</p>  <p>f. Wait 30 seconds.</p> <p>g. If this does not resolve the issue, the cables or Base Station may need to be replaced. Contact VRSim tech support.</p>
<p>“Turn on your Vive HMD” reappears after restarting application</p>	<p>1. You follow the instructions on the “Turn on your Vive HMD” screen at startup, and press “Restart Application.”</p>	<p>1. Press “Restart Application.” Sometimes you may need to do this step ~2-3 times.</p>
<p>Valve Index shows a blue light</p>	<p>2. The same “Turn on your Vive HMD” screen appears after the application restarts.</p> 	<p>2. Follow <a href="#">“No image in the HMD / no light on the HMD.”</a></p> <p>3. Follow <a href="#">“Link Box Details.”</a></p> <p>4. For SimSpray Go, if using Laptop B (Lenovo Legion 7i), make sure to connect the USB-C dongle to the left, back USB-C (Thunderbolt), not the left, front USB-C port.</p> <p>5. For SimSpray Go, fully power cycle:</p> <ol style="list-style-type: none"> <li>Fully power down the unit.</li> <li>After 30 seconds, disconnect the power from the wall.</li> <li>Wait 10 seconds.</li> <li>Connect the power to the wall.</li> <li>Turn on the laptop.</li> <li>Wait until SimSpray loads.</li> <li>Do not turn on the VIVE linkbox until prompted.</li> </ol>

Item/Location	Description/Symptoms	Next Steps/Actions
Cannot complete "Reset Space"	<p>1. After pressing "Proceed" on the "Reset Space" screen, the "Scanning" bar never fills up.</p> 	<ol style="list-style-type: none"> <li>1. Make sure the gun light is green or orange. Follow "<a href="#">Gun Not Visible.</a>"</li> <li>2. Make sure no one is standing between the gun and case.</li> <li>3. Make sure the VIVE tracker is facing the case.</li> <li>4. Make sure the gun is in the motion tracked space. It must be far enough away that any tables, objects, or the SimSpraySimSpray Go case do not obscure the line of sight between the VIVE Tracker and base stations. I.e., place the VIVE Tracker at least 4' (1.2m) in front of the case. Move the VIVE Tracker even further away if still having issues.</li> <li>5. Make sure both base stations have green lights. See "<a href="#">Base Station light codes.</a>"</li> <li>6. Possibly change base station frequencies. Follow "<a href="#">Base Station Setup Error / Changing frequencies.</a>"</li> </ol>
Base Station light codes		<ul style="list-style-type: none"> <li>• Powered off: <ul style="list-style-type: none"> <li>○ Light not lit.</li> </ul> </li> <li>• Stabilizing: <ul style="list-style-type: none"> <li>○ Blue or blinking blue = base station is waiting to stabilize. If it remains in this state, check if it is mounted securely or on a surface that's not prone to vibration.</li> </ul> </li> <li>• Normal: <ul style="list-style-type: none"> <li>○ Green or white = normal mode.</li> </ul> </li> <li>• Error <ul style="list-style-type: none"> <li>○ Blinking red = error. See below for troubleshooting.</li> </ul> </li> </ul>
Base Station red light	<p>A base station shows a blinking red light.</p> 	<p>This indicates an error, usually from hardware.</p> <ol style="list-style-type: none"> <li>1. Contact tech support: <ol style="list-style-type: none"> <li>a. Contact your distributor or VRSim. <ol style="list-style-type: none"> <li>i. Fixing this issue normally requires a physical replacement of the base station (VIVE base station 2.0) and/or power cable.</li> </ol> </li> <li>b. After getting replacement hardware, follow the <a href="#">instructions to replace a base station.</a></li> </ol> </li> <li>2. If you need to fix this issue immediately and cannot wait, sometimes but infrequently attempting the following may provide a workaround: <ol style="list-style-type: none"> <li>a. Disconnect the base station's power cable, HL0 or HR0, at the top of the arm. Loosely twist the cable in both directions, and</li> </ol> </li> </ol>

Once the taskbar is open, find the internet connection icon and click on it.</li> </ol> </li> </ol>

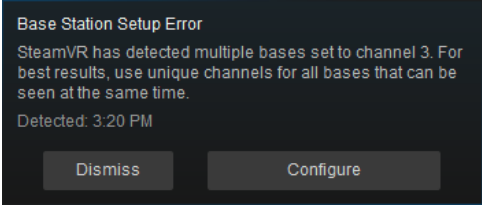

Item/Location	Description/Symptoms	Next Steps/Actions
	<p>SimSpray unit is connected to the internet.</p>	<div data-bbox="1234 168 1491 240">  ,   , or   </div> <p>d.</p> <p>e. Find your local wifi connection, ensure the “connect automatically” box is checked, and then connect to that wifi connection. Enter your wifi credentials if prompted. You do not need the computer to be discoverable. This should be all you need to do to ensure that your unit automatically connects to your wifi when you start it up.</p> <p>i. <b>Note: if the wifi connection is weak or not stable, you may need to add compatible wifi antennas to the computer or use a wired ethernet connection instead.</b></p> <p>f. Press the Windows key to open the taskbar.</p> <p>g. Type “Chrome” using the keyboard, and hit enter to run SimSpray Google Chrome.</p> <p>h. In Chrome, in the navigation bar at top, type the following, and then press Enter: <a href="https://www.google.com/">https://www.google.com/</a></p> <p>i. Verify the page loads. If not, then diagnose your internet connection or ask your IT for help.</p> <p>2. If using wifi, double check your wifi connection is set to auto connect on startup.</p> <p>a. See the above details.</p> <p>3. Run the <a href="#">Windows Firewall hotfix</a>.</p> <p>4. Verify that you have a stable connection that does not drop.</p> <p>a. If you are having trouble maintaining a constant wifi connection, your unit will benefit from a wired connection or adding wifi antennas.</p> <p>i. Details: wifi antennas were added to SimSpray 3 units shipped late November 2021. SimSpray 3 units before then do not have the antennas but do have wifi. Purchasing a compatible set of antennas may help if using wifi. Alternatively, use a wired ethernet connection instead.</p>

Item/Location	Description/Symptoms	Next Steps/Actions
		<ol style="list-style-type: none"> <li>5. If using wifi, check that the wifi user the SimSpray computer is signed into that can access the outside internet and is not internally restricted. Ask your IT department if unsure.</li> <li>6. Verify with your IT department that <a href="https://data.simspray.net">https://data.simspray.net</a> is not blocked, especially on port 443. This may need to be whitelisted.</li> <li>7. Contact VRSim tech support.</li> </ol>
Curriculum mode - "Hardware ID must be registered"	<p>When trying to create a new user in Curriculum Mode, the following messages display:</p> <ul style="list-style-type: none"> <li>• "New User Registration"</li> <li>• "Hardware ID must be registered by support"</li> </ul>	<ol style="list-style-type: none"> <li>1. Follow <a href="#">Curriculum mode hardware ID</a>.</li> </ol>
Curriculum Mode - progress not saved or incorrect	<p>You see any of the following symptoms:</p> <ul style="list-style-type: none"> <li>• Your Lesson scores are different between Curriculum Mode on SimSpray and the Portal website.</li> <li>• You have 2 or more SimSpray units, and the Lesson scores in Curriculum Mode are different between the 2 SimSpray units.</li> </ul> <p>Note:</p> <ul style="list-style-type: none"> <li>• Curriculum Mode is in software v3.3 or later.</li> </ul>	<ol style="list-style-type: none"> <li>1. To have student data show in Portal, the SimSpray unit must be connected to the internet. <ol style="list-style-type: none"> <li>a. Follow "<a href="#">Curriculum Mode - cannot connect</a>".</li> <li>b. Note: customers who are not allowed to ever connect the SimSpray unit to the internet (e.g., department of defense) may need to switch the unit to offline Curriculum Mode, new to v3.3. Contact tech support for more info about this. <ol style="list-style-type: none"> <li>i. To check if you are in offline mode, go to Curriculum Mode. If you do not see a wifi icon on the top right, then you may be in offline mode. In this mode, your scores will not be saved to Portal.</li> </ol> </li> <li>c. <b><u>Any offline progress will not show in Portal.</u></b> <ol style="list-style-type: none"> <li>i. Performance Portal does not save or store data, performance, or new users if offline. Any Courses or Lessons completed by students while offline will not show in Portal.</li> <li>ii. For example, if a student attempts to sign in but has no connection, signs in offline, and completes a Lesson, this Lesson attempt will not show in Portal. The data is not synced between offline and online after the SimSpray unit connects back online.</li> </ol> </li> </ol> </li> </ol>

Item/Location	Description/Symptoms	Next Steps/Actions
		<ol style="list-style-type: none"> <li>2. Custom Paints, Lessons, and Courses are local to the SimSpray unit and will not show in Portal.               <ol style="list-style-type: none"> <li>a. SimSpray Portal will not show custom Lessons or Courses. As a teacher, to see student progress, sign into Admin Mode, go to Curriculum, and Export the user data to a USB thumb drive for each SimSpray unit.</li> <li>b. Student scores will be local to the SimSpray unit. I.e., if you have two units A and B, then any progress on A will not show up on B.</li> </ol> </li> <li>3. If using Curriculum Mode in offline mode, student profiles and progress are local to the SimSpray unit the student used.               <ol style="list-style-type: none"> <li>a. Student scores will be local to the SimSpray unit. I.e., if you have two units A and B, then any progress on A will not show up on B.</li> </ol> </li> </ol>
<b>PERFORMANCE PORTAL:</b>		
Performance Portal - creating users, signing in, or credentials	<p>In the Performance Portal, you do not know how to create a user or what credentials to use.</p> <p>Note:</p> <ul style="list-style-type: none"> <li>• This feature requires your SimSpray unit is running software version 3.3 or later AND your SimSpray unit is connected to the internet.</li> </ul>	<ol style="list-style-type: none"> <li>1. To create a user in Portal:               <ol style="list-style-type: none"> <li>a. On a non-SimSpray computer, go to Portal (<a href="https://portal.simspray.net/user/login">https://portal.simspray.net/user/login</a>).</li> <li>b. Click “Create new account.”</li> <li>c. Enter your information.</li> <li>d. In the “Key” field enter the SimSpray Portal Student (for students) or Teacher (for teachers) Key                   <ol style="list-style-type: none"> <li>i. Note: this requires the teacher or admin to provide students with their organization’s Portal student key. If you are a teacher or admin and do not know this key, contact tech support.</li> </ol> </li> <li>e. Submit the info by clicking the “Create new account” at bottom.</li> </ol> </li> <li>2. To sign into Portal, sign in here: <a href="https://portal.simspray.net/user/login">https://portal.simspray.net/user/login</a>.</li> <li>3. If you forget your credentials, press the “Reset your password” button on the login page.               <ol style="list-style-type: none"> <li>a. Note: teachers may be able to edit student accounts.</li> </ol> </li> </ol>

Item/Location	Description/Symptoms	Next Steps/Actions
Performance Portal - progress not saved or incorrect	<p>The progress, scores, or user accounts do not match between your SimSpray unit's Curriculum Mode and what is shown on Portal (<a href="https://portal.simspray.net/user/login">https://portal.simspray.net/user/login</a>).</p> <p>Note:</p> <ul style="list-style-type: none"> <li>This requires you have SimSpray software version 3.3 or later AND your SimSpray unit is connected to the internet.</li> </ul>	<p><i>Note: student data from SimSpray software version 3.2.2 or earlier will not show up in Portal.</i></p> <ol style="list-style-type: none"> <li>Go to your SimSpray unit, and verify your software version is 3.3 or later. <ol style="list-style-type: none"> <li><a href="#">Check your software version number.</a></li> </ol> </li> <li>Verify data is sending properly from SimSpray. Click "Next."</p> <div data-bbox="1136 786 1961 1252"></div> <p>9. Click "Done."</p>

Item/Location	Description/Symptoms	Next Steps/Actions
		 <ol style="list-style-type: none"> <li>10. Double click on the SimSpray shortcut on the desktop.</li> <li>11. Test going in and painting, blasting, or powder coating.</li> <li>12. When issues are resolved, if you took out the mouse and keyboard, put them back, put the back metal plate back on, and tighten the 2 thumb screws to attach the plate back onto the SimSpray unit.</li> </ol>

WHERE TO PAINT, BLAST, OR POWDER THE PART:		
Live Scene - where to paint, blast, or powder coat on the part	Certain areas of the virtual part are expected to be painted, blaster, or powder coated. Other areas are not.	Some areas are unscorable and not expected to be painted. These areas are often indicated with a surface that is unclear.
Scorable regions		If you paint in these areas, your Transfer Efficiency will decrease because material is wasted, and your Mil Build Score will <i>not</i> increase. Other parameters such as Angle, Distance, and Speed will still be scored.
No mil build score or 0 mil build		

Item/Location	Description/Symptoms	Next Steps/Actions
		<div>   </div> <div> <div> <b>Clean</b>  Paint, Blast, or Powder Coat this side. </div> <div> <b>Unclean</b>  <i>Don't</i>  Paint, Blast, or Powder Coat this side. </div> </div> <p>If you are facing the front of the unit with your HMD on, you are expected to:</p> <ul style="list-style-type: none"> <li>• Paint or blast: <ul style="list-style-type: none"> <li>○ For SimSpray 3: <ul style="list-style-type: none"> <li>■ Starting v3.4: The front facing side of most parts.</li> <li>■ v3.3.3 or earlier: The right facing side of most parts.</li> </ul> </li> <li>○ For SimSpraySimSpray Go: The front facing side of most parts.</li> <li>○ The top of most horizontal parts.</li> </ul> </li> <li>• Powder coat: <ul style="list-style-type: none"> <li>○ In the Electrostatic Booth Environment: the full part.</li> <li>○ In the Electrostatic Conveyor Environment: <ul style="list-style-type: none"> <li>■ Starting v3.4: The front facing side of most parts.</li> <li>■ v3.3.3 or earlier: The right facing side.</li> </ul> </li> </ul> </li> <li>• See "<a href="#">Positioning SimSpray for best motion tracking.</a>"</li> </ul>

EXTERNAL DISPLAY:		
TV, projector, smart board, or monitor adding	How to	Use an additional external display if you want more people to be able to see the image and (optionally) hear the sound of SimSpray:

Item/Location	Description/Symptoms	Next Steps/Actions
		<ol style="list-style-type: none"> <li>1. Verify the external display (TV, projector, or monitor) supports 1920x1080 resolution and progressive scanning (1080p).</li> <li>2. Connect an HDMI cable to the SimSpray HDMI out. <ol style="list-style-type: none"> <li>a. For SimSpray 3: this port is located at the back or, for older units, on the inside near the power button.</li> <li>b. For SimSpraySimSpray Go: this is located on the HDMI splitter behind the laptop.</li> </ol> </li> <li>3. Connect the cable to the external display's HDMI in.</li> <li>4. Turn on the external display.</li> <li>5. Make any other AV adjustments on the external display (e.g., which video input is being used, scaling, zoom, sound unmuted and volume adjustment).</li> </ol> <p>Notes:</p> <ul style="list-style-type: none"> <li>• The SimSpray image is intended to display on both the monitor and external display.</li> <li>• Sound is intended to play from the SimSpray speakers and external display for external displays that support sound.</li> <li>• Touch will only work on the SimSpray 3 touchscreen.</li> </ul>
TV, projector, smart board, or monitor no, fuzzy, or pixelated image		<ol style="list-style-type: none"> <li>1. See <a href="#">“TV, projector, smart board, or monitor adding.”</a></li> <li>2. Fully power cycle SimSpray off and then on. See <a href="#">“Setting up and powering off”</a> and <a href="#">“Setting up and powering on.”</a></li> </ol>

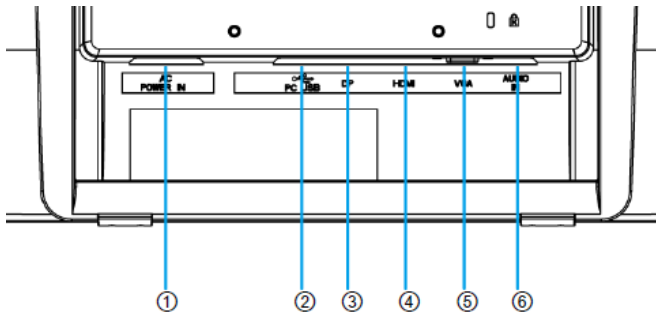

ADMIN MODE:		
Cannot access Admin mode		<ol style="list-style-type: none"> <li>1. After turning on the system and selecting a product, click on “Admin.”</li> <li>2. Use the code provided with your system. It is typically printed on a small card. <ol style="list-style-type: none"> <li>a. If someone in your organization has changed the code, request this from them.</li> <li>b. If you do not know the new code or cannot find the default passcode, contact tech support.</li> </ol> </li> </ol>
Outputting student lesson completion	How to	<ol style="list-style-type: none"> <li>1. Insert a USB thumb drive into one of the USB outputs.</li> <li>2. Go into “Admin” mode. See <a href="#">“Cannot access Admin mode.”</a></li> <li>3. See <a href="#">Tracking Lesson Progress</a> on <a href="http://support.simspray.net/">http://support.simspray.net/</a>.</li> </ol>

Item/Location	Description/Symptoms	Next Steps/Actions
Outputting Paintometer Info	How to	<ol style="list-style-type: none"> <li>1. Insert a USB thumb drive into one of the USB outputs.</li> <li>2. Click on “Options” and then “Paintometer.”</li> <li>3. Go to the advanced options, and select to output a snapshot of the data.</li> </ol>
Paint Editor has too large values	The Paint Editor values in Admin Mode are large, and when editing the values the value ranges are more restricted than normal.	<ol style="list-style-type: none"> <li>1. Make sure you have not changed the Windows region settings. See <a href="#">Windows Region Settings</a>.</li> </ol>

NO POWER:		
Unit not powering on	The SimSpray or Go unit does not power on.	<ol style="list-style-type: none"> <li>1. For SimSpray: <ol style="list-style-type: none"> <li>a. Check the power extension cable on the outside of the unit is tightly connected to the shorter power strip cable.</li> <li>b. Check the power cable is connected to the wall outlet.</li> <li>c. Press the power button at the front of the unit.</li> <li>d. If the unit does not power on, continue.</li> <li>e. Follow “<a href="#">Accessing the inside of the SimSpray unit.</a>”</li> <li>f. Check the computer is connected to a power cable, and this is connected to the power strip.</li> <li>g. Check the unit’s front power button is connected to the internal computer.</li> </ol> </li> <li>2. For SimSpray Go: <ol style="list-style-type: none"> <li>a. Check the power cable is connected to the wall outlet.</li> <li>b. Check the laptop power cable is connected to the laptop.</li> <li>c. Lift up the laptop foam and: <ol style="list-style-type: none"> <li>i. Check the laptop cable is connected to the power strip.</li> <li>ii. Check the laptop power brick is connected to the power cable (if it is a 2-part power supply).</li> </ol> </li> <li>d. Press the power button on the laptop.</li> </ol> </li> </ol>

NO IMAGE:		
No image on the monitor		<p>For SimSpray 3:</p> <ol style="list-style-type: none"> <li>1. Verify there is a light on the bottom, right of the touchscreen. If not, then press the power button.</li> </ol>

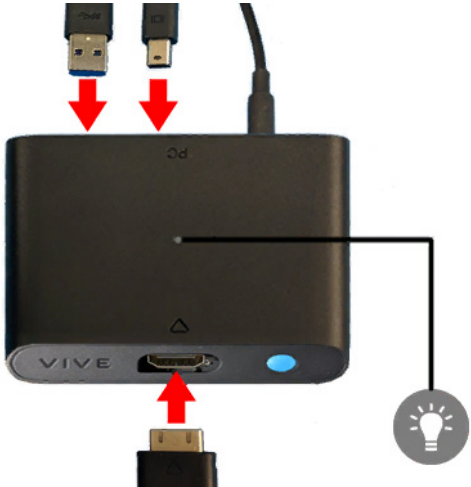

Item/Location	Description/Symptoms	Next Steps/Actions
		 <p>4. If using a Blasting Gun:</p> <ol style="list-style-type: none"> <li>If the VIVE tracker is green or white, then: <ol style="list-style-type: none"> <li>Follow the blasting cable back to the USB connection.</li> <li>Disconnect the USB cable from the SimSpray 3 unit.</li> <li>Undo the cable wrap and electrical tape connecting the Y-cable to the rest of the cables. Set the Y-cable aside.</li> <li>Connect the 2 USB cables to your SimSpray unit</li> <li>Select “Retry” onscreen.</li> </ol> </li> </ol> <p>5. Make sure you have not changed the Windows region settings. See <a href="#">Windows Region Settings</a>.</p>

LAUNCHER SCREEN:		
Launcher screen	Launcher screen comes up	<p>Applies to VIVE Pro 2 HMD only. The launcher screen comes up</p> <p>This screen comes up:</p> <ol style="list-style-type: none"> <li>After the SimSpray 3 unit or SimSpray Go laptop is turned on and Windows loads.</li> <li>Follow the instructions on the monitor.</li> </ol>

Item/Location	Description/Symptoms	Next Steps/Actions
		

ACCESSING INTERNAL HARDWARE:		
Accessing the inside of the SimSpray unit	If you need to access the interior of the SimSpray unit to check connections	<p>SimSpray 3:</p> <ol style="list-style-type: none"> <li>1. Locate the back metal plate of the SimSpray unit.</li> <li>2. Unscrew the 2 top thumbscrews holding it to your SimSpray unit.</li> <li>3. Carefully remove the panel.</li> </ol> <p>SimSpraySimSpray Go:</p> <ol style="list-style-type: none"> <li>1. Power down the laptop.</li> <li>2. Disconnect the laptop connections.</li> <li>3. Remove the laptop.</li> <li>4. Lift up and remove the foam.</li> </ol>
Attaching a mouse and keyboard for tech support	If VRSim tech support asks you to attach your mouse and keyboard in order to access your computer, follow these instructions.	<p>SimSpray 3:</p> <ol style="list-style-type: none"> <li>1. To add a mouse and keyboard (<i>note: you can potentially do this using the touchscreen only, but using a mouse and keyboard is safer</i>): <ol style="list-style-type: none"> <li>a. Locate the back metal plate of the SimSpray unit.</li> <li>b. Unscrew the 2 top thumbscrews holding it to your SimSpray unit.</li> <li>c. Carefully remove the panel.</li> <li>d. Remove the mouse and keyboard from their box on the inside of the back panel.</li> <li>e. Connect the mouse and keyboard to any available USB port on the SimSpray unit (e.g., at the front USB ports of the SimSpray unit).</li> </ol> </li> </ol>

Item/Location	Description/Symptoms	Next Steps/Actions
Detaching a mouse and keyboard after tech support	After tech support is done, VRSim tech support may ask you to replace the mouse and keyboard into your SimSpray unit.	SimSpray 3: <ol style="list-style-type: none"> <li>1. With the SimSpray unit's back panel off, place the mouse and keyboard back into their box on the inside of the back panel.</li> <li>2. Place the back metal plate back on.</li> <li>3. Tighten the 2 thumb screws at the top of the back metal plate to attach it to the back of the SimSpray unit.</li> </ol>

PAINTING:		
Changing air or fluid pressure does not change the paint	On the Equipment settings page or when using the In-Sim Tablet, changing the air or fluid pressure does not affect the physics.	Changing the air or fluid pressure is not intended to and does not affect the paint type or physics. These numbers are there only to expose users to and reinforce proper settings ranges.
Changing equipment settings has no effect in Powder		In Powder, the Powder Delivery, Total Air, Current, and Voltage settings on the Equipment page and In-Sim Tablet do not gate (do not prevent the user from going into Powder Coating), can switch back to defaults, and have no effect on the Powder physics.  The tip type does change the physics.
Equipment settings keep defaulting	After changing an equipment setting, it changes back to a default.	In Powder, the Powder Delivery, Total Air, Current, and Voltage settings may not actually gate (this is a known bug), settings may default back if changed (this is a known bug), and these settings do not affect physics (as designed). See bugs 9733, 10975, 10977, 10978.  For liquid Paint in v3.4.x+, here are steps that can cause equipment settings to default back: <ol style="list-style-type: none"> <li>1. On the equipment settings page, change the air and/or fluid pressure for liquid paint.</li> <li>2. Get into painting.</li> <li>3. On the in sim tablet, go to equipment settings.</li> <li>4. Notice the pressures (air and/or fluid) (as shown both on the in sim tablet and monitor) are set back to the defaults.</li> <li>5. Change the pressures in sim, and exit the pressures menu.</li> <li>6. Repeat steps 3-4.</li> </ol> Workaround for Paint: Change Machine Settings in Admin mode to Manual.

Item/Location	Description/Symptoms	Next Steps/Actions
Dripping paint	Drips keep forming when painting.	<ol style="list-style-type: none"> <li>1. Put down less paint by changing your technique (angle, distance, or speed) or by adjusting the gun settings (tip size, amount of trigger pull, or fan pattern).</li> <li>2. Drips form when too much paint is applied (when the Coverage Map shows deep red). The allowable Mil Build range is defined by the chosen Paint. Choose a different Paint or make a custom Paint.</li> <li>3. If running a software version before v3.4: <ol style="list-style-type: none"> <li>a. Toggle all Visual Cues on and then off every hour of use or when the symptoms occur.</li> <li>b. Alternatively, contact support to see if you are eligible for or can purchase software v3.4 or later.</li> </ol> </li> </ol>

IN-SIM TABLET:		
Finding the In-Sim Tablet	While wearing the HMD, cannot find the In-Sim Tablet	<ol style="list-style-type: none"> <li>4. Make sure you are in the paint, powder, or blast environment.</li> <li>5. Move closer to one of the walls until the Tablet appears. By default, the Tablet will typically be found docked on the inside of the closest of the four walls of the tracking environment. Note that the User will normally need to turn around to see the Tablet.</li> <li>6. To redock the Tablet to the side walls, point the Gun at any of the 'Return' boxes located on the walls.</li> </ol>
In-Sim Tablet use	Unsure how to use the In-Sim Tablet	<p>The In-Sim Tablet makes it easy to do common actions while keeping the HMD (helmet) on.</p> <p>Controls:</p> <ol style="list-style-type: none"> <li>1. Coating – View Coating Mode.</li> <li>2. Coverage Map – Enable or disable Coverage Map Mode.</li> <li>3. Defects – View Defects. Select the defect to highlight from a secondary menu. <i>Note: defect selection is limited to applicable defects in the selected process.</i></li> <li>4. Angle – Enable or disable the Angle Cue.</li> <li>5. Distance – Enable or disable the Distance Cue.</li> <li>6. Speed – Enable or disable the Speed Cue.</li> <li>7. Controls shown here are dictated by the selected processes. These controls include:</li> </ol>
